STATE GEOLOGICAL AND NATURAL HISTORY SURVEY

# Ground Beetles of Connecticut

## An Annotated Checklist

By William L. Krinsky and Michael K. Oliver

This is a checklist of the ground beetles (Carabidae) found to occur in Connecticut. Whether amateur or professional, this is a document for the serious student of beetles and other insects. It is not just a checklist, but an annotated checklist with maps. Of the 362 species reported in this checklist, 51 have not been collected since 1950, of which 40 are likely to have become extinct. Conversely 44 species have been collected for the first time since 1950.

Now available in the DEP Store,  
on the Web, or by fax.

54 color photographs. iv+308 pages, paperbound **\$25.95**
